MOCON MOVES TO NEW FACILITY; EXPANDS LAB, MANUFACTURING CAPABILITY

MINNEAPOLIS, Minn, July 21, 2010 – MOCON, Inc. (NasdaqGM:MOCO) announced today that it has moved its corporate headquarters to a new Twin Cities location. The new facility at 7500 Mendelssohn Avenue North, Minneapolis, MN 55428, also will house larger production and laboratory functions.

The move was prompted by increased worldwide demand for the company's test and measurement instrumentation as well as its laboratory testing capabilities. The new site totals 60,000 square feet, a 27% increase over the former space.

The new location will incorporate five laboratories and expanded manufacturing space which will enable the company to accommodate its anticipated future growth. Production and lab areas have been increased by 50%. The facility will also feature a state-of-the-art training center to provide hands-on instruction for the company's various product lines.

"This investment will enable MOCON to provide even greater value to the global medical, pharmaceutical, food and beverage, packaging, environmental and oil and gas markets. We will be expanding our capability for engineering and product development, testing, production capacity and customer service," stated Robert L. Demorest, MOCON president and chief executive officer. "We look forward to serving our customers from our new headquarters."

About MOCON

MOCON is the premier instrumentation manufacturer and testing service provider for permeation testing, package integrity, shelf-life evaluation, package cost reduction, sustainability and package safety. In addition to the Minneapolis headquarters, the company has two other U.S. facilities (Colorado and Texas), as well as locations in China and Germany to better serve global needs. See www.mocon.com for more information.

This press release contains forward-looking statements that involve a number of risks and uncertainties. Important factors that could cause actual results to differ materially from those indicated by such forward-looking statements include but are not limited to: uncertainties relating to competition and technological change, setbacks in product development program, slower-than-anticipated customer acceptance of new products, dependence on certain key industries, risk associated with the Company's acquisition strategy and international operations, and other factors set forth in the Company's filing with the Securities and Exchange Commission.
